

Mushroom Data Sheet

Date:

Location:

Habitat: Hardwood/softwood/mixed forest; pastures/lawns; flower beds/disturbed places;
flower pots

Substrate: Soil/peat; wood; humus/leaves; dung; moss; other fungi

Odour: anise/garlic/meal

Taste: bitter/peppery/mealy

Pileus (cap): Colour:
Shape: Diameter: cm
Surface: smooth/fibrillose/granulose/scaly/warted
Cuticle: viscid/glutinous/hygrophanous/dry
Margin: regular/irregular, flat/inrolled/upturned, striate
Flesh: texture, colour, latex exudates on bruising Thickness: mm

Lamellae (gills):
Colour: young mature
Texture: Thickness: Thick/thin
Attachment:
Arrangement: crowded/close/distant; long/short, forked
Margin: entire/erose; encrusted

Partial veil (covering gills):
Colour:
Type: persistent/evanescent; glutinous/fibrillose/cobwebby/membranous

Annulus (ring): Type: pendent (skirtlike)/peronate; (sheathlike)/armillate (collar-like);
movable/fixed
Position: high/median/low

Stipe (stalk): Length: cm
Colour:
Shape: equal/tapering; clavate/bulbous Thickness: cm
Insertion: central/excentric/lateral
Texture: solid/hollow/stuffed; fleshy/cartilaginous/cheesy
Surface: smooth/scaly/fibrillose; viscid

Universal veil (covering entire fruiting body):
Type: persistent/evanescent

Volva: Texture:
Type: saccate/squamose/annular/torquate (collar-like)

Spores: Colour in mass (spore print): white/cream/yellow; lilac; pink/salmon; green;
yellow-brown/rusty brown/ cinnamon; purple brown/chocolate; smoky grey/black
